## THE REGINALD FESSENDEN PRIZES IN INNOVATION

Reginald Aubrey Fessenden was a larger than life Canadian inventor and pioneer of radio communication. The holder of over 500 patents, Fessenden was first to transmit wireless speech in 1900 – preceding by one year Marconi’s famed transatlantic broadcast of Morse code. Microphotography, a paging device and a turbo electric drive for ships are among his numerous other inventions.

Three annual prizes shall recognize novel research with commercialization potential and commemorate Reginald Fessenden’s numerous innovations.

<b>Undergraduate student</b>	<b>\$2,500</b>
<b>Graduate student</b>	<b>\$3,500</b>
<b>Professor</b>	<b>\$4,000</b>
