

Senate Caucus Representative Report — Council of October 10, 2019

This report details my activities spanning July 1 to October 6, inclusive.

SSMU Activities

I have taken part in meetings of the SSMU Senate Caucus and Legislative Council as the new academic year begins. I had the chance to submit two questions to the Executive of SSMU on behalf of constituents, one relating to language rights, the other to the upcoming Outaouais Campus of McGill's Faculty of Medicine.

I could unfortunately not be present at the greater part of Senate on September 18, due to academic obligations. Topics discussed included the University's position on Bill 21 as well as a motion to cancel classes for the September 27 climate strike, which was defeated. Also notable were the routine items of business serving to nominate members to various committees; I was nominated for the Committee on Student Services as well as the Rossy Wellness Hub Advisory Board.

MSS Activities

I have been working with the MSS president on the establishment of a student society for the upcoming Outaouais Medicine Campus. This includes a review of systems in place for other medical student societies with decentralized teaching sites, focus groups, as well as liaising with other interested groups such as SSMU and the University.

The MSS also held its fall election and referenda, during which all positions were filled and a strike vote for the September 27 climate march passed by a wide margin.

Other

I have no other activities to report.

Respectfully submitted,

André Lametti

Senate Caucus Representative — Students' Society of McGill University

Member of the General Council — Medical Students' Society
