

# Engineering Councilor Report

February 13, 2020

## New and Noteworthy

- The EUS is looking into restructuring the format of its Council. The working group is set to present in the upcoming weeks in order to have a new and updated format by the next Fall semester.
- The EUS executive team gave their Midterm reports: everything is in order
- Many hours of hard work were put into getting the IRP up and running by our VP Internal. It is a great achievement for inter-faculty cooperation, and will hopefully bring a lot of good to the McGill community.

## Events (Since My Last Report)

- QEC- Québec Engineering Competition - happened the weekend of 01-30
- CAD Madness happened last weekend (CADing version of a hackathon)
- TechFair was last week, it went great! Many interesting companies.
- And countless other departmental events

## Upcoming:

- EUS General Assembly is wednesday: Quorum is 100, let's reach it!

If you have any questions or comments, feel free to reach out to me,

All the best,

**Bruno Marcoux** (He, Him/ Il)

Engineering Representative to SSMU Council  
MC7, 3480 University St, Montreal QC, Canada
