FALL 2026 REPORT OF THE ENGINEERING UNDERGRADUATE SOCIETY

Dear members of the Legislative Council,

The Engineering Undergraduate Society reports the following:

PRESIDENT

- Found an auditor over the summer, VP Finance has been working hard to provide documents for them
- Have been serving as interim Board Chair since our chair resigned in September
- The Executive Committee is off to a great start! Retreat was in October and the team works quite well together
- Started holding Weekly check-in's with SSMU Rep and Senator
- SSMU Rep and Senator hold regular office hours
- Indigenous Inclusion Committee quite active and ran a successful event for Truth & Reconciliation day
- Still a lot of vacant positions in my portfolio, applications closing soon.

VP FINANCE

- Fall budget review was very comprehensive
- Currently doing funding committees for space fund, design team fund, and clubs fund
- In the process of going through our first full audit since before Covid
- Working on automating some recurring bookkeeping tasks

VP ACADEMIC

- Fall TechFair happened and went very well!
- Working with the Engineering Peer Tutoring Service on changing the courses offered for next year (based on curriculum changes).
- Facilitating the integration of the global engineering students socially and academically.
- Funding through the Engineering Undergraduate Equipment Fund and the Engineering Undergraduate Support Fund is going well, I continue to tweak the process for more integrity from profs and students.
- Working with the McGill Engineering Student Centre/Engineering Career Center on a few initiatives.

VP EVENTS

- Ran MERTW with a good turnout despite the rain

3480 Rue University
McConnell Engineering Building, Room 7
Montreal, QC H3A 0E9

- The Engineering Adventure Committee is alive again, with 2 successful trips and a third incoming, and the Engineering Socials Committee is attempting to be alive with an EWeek hype night
- Fall Iron Ring is on track to be fun and do well financially.

VP EXTERNAL

- No “regular” External Relations Director for the whole year, as only one person applied, and wasn’t able to be there for every instance. So one External Relations Director per conference is assigned, it also gives more students the opportunity for “micro-involvement”.
- Summit on Development of Engineering Societies ran at Windsor, ON ; excellent, friendly and cooperative relations were maintained with Ontarian and Atlantic universities specifically.
- The Conference on Diversity in Engineering is about to be held in Victoria, BC ; logistics is figured out, 1 delegate is taken there.
- CSE is on track, the committee is working hard, a lot of interest is also being heard, encouraging considering how early we are.
- BoGE accession to Quebec Confederation for Engineering Student Outreach events, the main focus for Fall is a success, need to re-process it every year though. The Congrès Régulier 2 of the Confederation is approaching and will be held in Québec City
- Discussion with the different administrative bodies on-going (Canadian Federation of Engineering Students, QUESO, McGill) to ensure our ability to bid for either Canadian Engineering Leadership Conference or EngGames in 2028, as both organisations are looking for a school to host. May result in a joint hosting with at least Concordia and Polytechnique Montréal

VP SERVICES

- Successfully ran Fall Open Air Pub, hiring for Winter Open Air Pub
- Hired new G-Store employees, G-Store now sells new drinks and sells/rents books
- Frostbite continues
- Hired new Copi-EUS employees
- In general, continuing to oversee the EUS Mall
- New executive committee for Sustainability in Engineering At McGill

VP INTERNAL

- Oversaw changes in drinks and prices at Blues Pub
- Hired for E-Week
- Organising Banquet on 25 November
- Frosh, in August, was successful and is almost completely finalised apart from some final financial matters with other faculties
- Junior Council and First Year Fund running

3480 Rue University
McConnell Engineering Building, Room 7
Montreal, QC H3A 0E9

- New CAD contract negotiated

VP STUDENT LIFE

- Paid for students to work as interns on projects with Design Teams over the summer through the Design Team internship program
- Organised involvement day to showcase our Clubs and Design Teams to the student body
- Organised a retreat for our Council with 60 people attending for the two days
- Ran a clubs audit with middling results; more clubs have been placed on probation than originally thought
- Multiple Design Teams had great success at competitions this summer and fall

VP COMMUNICATIONS

- Completely reworked our main website
- Revived the Plumber's Ledger, the engineering newspaper (already published its first issue!)
- Revived the Plumber's Station, the engineering filmmaking committee
- Helped a lot of groups with IT stuff and made maintenance of websites way easier
- With a handbook editor, created a student handbook over the summer that was shared with everyone at frosh
- Completely rebranded our newsletter (the Pipeline) and made it way easier to edit
- Hired a creative director for the first time in a while; he's working on our overall branding

SENATOR

The EUS Senator resigned. The EUS will appoint a new Senator. Before, they had worked on the University's AI policy and held the position of Senate Caucus Representative 1 at the Legislative Council.

Sincerely,
Hector Giraud, Engineering Representative
